PROFILE

Full-Stack Developer with experience across software development, machine learning, automation, systems integration and AI-powered applications. Proven track record of building applications from the ground up, integrating business platforms, and delivering solutions that improve operational efficiency and user experience.

LAST PROFESSIONAL EXPERIENCE

PhoenixCare – (Mar 2026 – Current Job) Remote – Part Time

Project Description: Phoenix Care is a healthcare communication platform that enables real-time patient engagement through voice interactions, AI-assisted workflows, and care management services.

Role: Software Engineer

Responsibilities: Contributed to system architecture and develop full-stack features for a healthcare communication platform. Implemented voice call workflows, real-time communication services, speech-to-text capabilities, and AI-powered conversation analysis using LLM technologies.

Programming Languages: Typescript

Frameworks: AWS Bedrock, React

Architecture: Fastify, LAMNDA serverless.

Cloud providers: AWS

Database: Postgree SQL, Dynamo DB

Tools: Codex, Claude Code, Twilio, WebSocket, Docker, QUO.

Excelia – Grupo CARSO (Abr 2024 – Abr 2026) Remote

Project Description: SigOps — *Sistema Integral de Gestión de Obras y Proyectos* — is a comprehensive system for managing works and projects integrated to Microsoft dynamics365.

Role: Full-Stack Developer Consultant

Responsibilities: Developed a full-stack application from scratch. Implemented integrations with D365, contributed to database design, provided architectural guidance, and conducted code reviews to ensure code quality and maintainability.

Programming Languages: C#, SQL, Typescript, HTML, SCSS

Frameworks: .NET Core 9, React 18

Architecture: Clean Architecture

Cloud providers: Azure

Database: SQL Server

Tools: API, Dynamics 365, Azure DevOps

Pinnacle Aerospace - Genety (Feb 2023 – Feb 2024) Hybrid

Project Description: Requirements Management System

Role: Full-Stack, Mentor

Responsibilities: Development of features for microservices and front end. Use of SignalR to ensure real-time web application as collaboration tool. Propose solutions and fix for bugs found by the testing department.

Programming Languages: C#, SQL, Typescript, HTML, SCSS

Frameworks: .NET Core 7, Angular 17

Architecture: Clean Architecture

Cloud providers: Azure

Database: Postgree

Tools: API, Docker, SignalR, ReqIF, Material Design

Pinnacle Aerospace - CampusCE (Nov 2020 – Feb 2023) Remote

Project Description:

Continuous Education software with support for all types of continuous education programs.

Role: Full-Stack

Responsibilities:

Development of features for students, instructors admin portals.

Work with payment processors ensuring transaction quality for registrations.

Separate task from requirements and estimate of development hours.

Propose solutions and fix for bugs found by QA department.

Programming Languages: C#, HTML, JS, CSS, SQL, Python.

Architecture: Web Forms, Multi-tenancy

Cloud providers: Azure

Database: SQL Server

Tools: SSIS, API, Windows Service, Twilio, Recommender Systems.

Intersel (Nov 2019 - Nov 2020) Remote

Project Description: Onmichat platform centralized on messaging services.

Role: Full-Stack, ML

Responsibilities: Chatbot development as smart virtual assistant.

Research and development of NLP applications. Chatbot integración with web chats, web platforms and social media channels.

Programming Languages: Python, C#, SQL, JS, HTML, CSS

Frameworks: spaCy, Tensorflow, nltk, Rasa open source, .Net Core

Architecture: Conversation-Driven Development (CDD)

Cloud providers: AWS

Database: SQL Server, IndexedDB

Tools: API, Dialogflow, Social Media Channels, UIPath, SignalR

Qualisys (Feb/18 – Nov-2019)

Project Description: SAP Business One Development and Integrations.

Role: Full-Stack, SAP B1 Developer

Responsibilities: Technical Support, Electronic Billing,

SAP B1 automation, Desktop Software Development,

Systems integration with SAP B1, SAP B1 Add-Ons Development,

Web Portals Development with SAP Business One Integration.

Programming Languages: C#, HTML, Typescript, SCSS, SQL

Frameworks: SAP B1 SDK, SAP B1if, .NET Framework, Angular

Architectures: MVC, SPA

Database: SQL Server, SAP HANA

Tools: API, Windows Service, SAP B1, UIPath
